

COCOON BUILDING TECHNOLOGIES

A BETTER BUILDING ENVELOPE DELIVERING UNSURPASSED COMFORT AND PROTECTION

WHAT IS COCOON?

Cocoon brings together state of the art structural building panels and a process to erect the building quickly and efficiently. Each project is created in detail on a computer, allowing the production and pre-fabrication of precise building components that are assembled on the building site.

Simplified and cost effective high performance building assemblies for.....

Exterior
Structural
Insulated
Walls

Roofs

Foundation
and Frost
Walls

Interior
Support
Walls

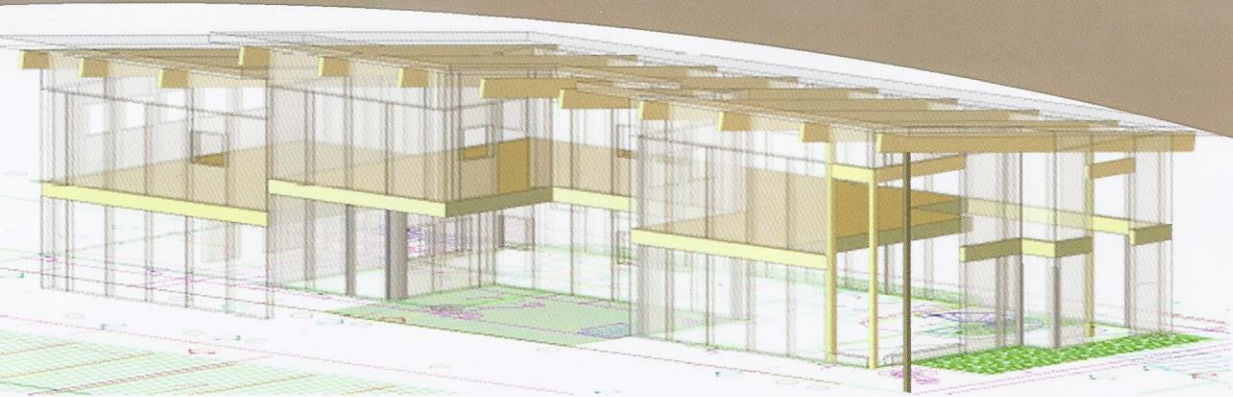

Floors

WHY SHOULD I USE THE COCOON BUILDING SYSTEM?

- Safer, healthier living environment
- Structurally superior to conventional construction
- Fast, Efficient and Cost Effective
- High energy efficiency
- Save up to 60% on utility bills
- Will not rot or mould
- Fire resistant – it will not burn!
- High impact resistance

Cocoon
BUILDING TECHNOLOGIES
by MagWall Inc.

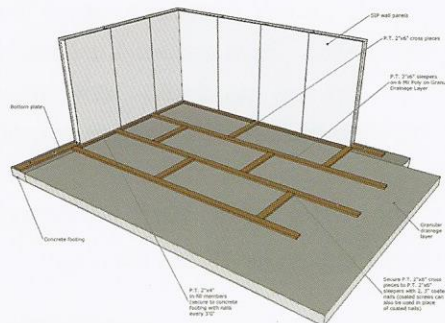

Virtual Smart Build

- Using the latest building information modelling software – with virtual smart build - the structure is built on a computer before it is constructed on the site.
- All components are pre-cut and labelled for easy construction on site.
- The build process is determined, materials are shipped direct and marshalled on site to promote seamless efficiency. Prefabricated components promote accuracy, speed of construction, and minimize site installation costs.

Technologically Advanced Process and Materials

- The latest knowledge in material science is used to create materials that are durable and cost effective.
- Magnesium Oxide sheathing replaces Oriented Strand Board. Our Magnesium Oxide sheathing passes third party testing for resistance to damage incurred by mould, moisture, fire, and insects.
- Our components are third party tested for structure and fire, giving architects and engineers confidence in applying our design specifications to your home or building.
- Panelized homes have repeatedly demonstrated superior ability to withstand extreme weather.

Professional Sales, Service and Installation

We will assist you, your builder or general contractor in erecting your building shell in a timely, cost effective manner.
